

Safety Assessment

Subject ID _____

Safety Assessment

Coordinator: Ask the subject to answer each question below before you administer albuterol to the subject and have the subject perform the 6-min walk test and the sit to stand test.

1. Have you ever had albuterol (Ventolin, Proventil or ProAir) prescribed by a physician?

- Yes
 No

2. Have you ever had an allergic or adverse reaction to albuterol or another bronchodilator?

- Yes
 No
(Coordinator: If yes, DO NOT administer Albuterol. Contact the physician investigator.)

3. Have you been diagnosed with abnormal heart rhythm? (For example: Arrhythmia, Atrial Fibrillation, Atrial Flutter)

- Yes
 No
(Coordinator: If Yes, contact the physician investigator before you proceed with administering albuterol. Share any medications the subject may be on for the condition with the physician.)

a. If yes, what diagnosis did you get?

b. In what year did you get this diagnosis?

4. Have you been told by a physician that you have heart disease? (For example: Angina, Congestive Heart Failure, Heart Attack, Stroke).

- Yes
 No
(Coordinator: If Yes, contact the physician investigator before you proceed with administering albuterol. Share any medications the subject may be on for the condition with the physician.)

a. If yes, what diagnosis did you get?

b. In what year did you get this diagnosis?

5. In the last three months, have you had chest pain or discomfort?

- Yes
 No
(Coordinator: If Yes, contact the physician investigator before you proceed with administering albuterol. Share any medications the subject may be on for the condition with the physician.)

6. Does the subject have any contraindications that disqualify them from the sit to stand test?

- Yes
 No

(For example: high fall risk, amputees without prosthesis, individuals with assistive devices, short term lower extremity impairment, and previous stroke with significant residual deficits in balance or proprioception.)

Coordinator:

This subject has potential safety concerns. Please consult the Physician Investigator.

1. Does the subject have any safety concerns?

- Subject has no safety concerns. Albuterol to be given. Spirometry, 6-min walk and sit to stand test to be done according to protocol
 Subject has safety issues. These were reviewed with the COPD Gene Investigator.

2. If yes, review with physician investigator.

a. Proceed with visit or reschedule

- Ok to proceed with visit
 Study visit will be rescheduled pending evaluation by personal physician

b. Which procedures may be performed: If OK to proceed with visit

	Ok to Proceed	Not Ok
Spirometry	<input type="radio"/>	<input type="radio"/>
Albuterol, post-BD spirometry & DLco	<input type="radio"/>	<input type="radio"/>
6-minute walk	<input type="radio"/>	<input type="radio"/>
Sit to Stand	<input type="radio"/>	<input type="radio"/>
